

```
1
2 Angular Application Flow ( in version 20) :-
3 1. "main.ts" it is the entry point for the application.
4
5 2. Angular AOT (Ahead-Of-Time) complier compiles templates and TypeScript into
6    optimized JavaScript before the browser runs the app,
7    improving startup speed and performance.
8
9 3. Bootstrapping is done. Bootstrapping means Angular application is started.
10
11 4. When the web page is displayed in browser it means Initial DOM ( Document object
12    model)  is created.
13
14 5. In Angular 20, a DOM updated when the data changes. When Data changes, then
15    partial DOM updates.
```
